

## **The 11<sup>th</sup> Symposium of the International Neurotrauma Society**

March 19-23, 2014

Hotel InterContinental, Budapest, Hungary

---

### INVITATION

On behalf of the Organizing Committee of the **The 11<sup>th</sup> Symposium of the International Neurotrauma Society (INTS-2014)** we would like to cordially invite you to participate at the Symposium.

The Symposium is aimed to unite clinicians and scientists to present and discuss the latest results and findings in translational/clinical- and basic sciences related to neurotrauma.

Appreciating that a thorough and rational assessment of the pathobiology of CNS injury, together with a systematic bench to bedside approach, are prerequisite for any breakthrough in patient care, this symposium will strive to address these goals, providing an opportunity for the discussion of new treatment strategies as well as the consideration of the guidelines currently used in the management of patients suffering from severe traumatic brain and spinal cord injury. The event also will provide a forum to debate contemporary problems in neuro-rehabilitation and patient follow-up.

Official language of the conference: English

Official website of the conference: <http://ints2014.com/>

**Registration, abstract submission**, the updated list of confirmed presenters and further details about the congress are available at: <http://ints2014.com/>

#### **Important deadlines**

Submission of registration form: February 28, 2014

Submission of abstract: November 30, 2013

**More information:** [info@ints2014.com](mailto:info@ints2014.com)

**Budapest warmly welcomes all participants of the INTS 2014!**

**Andras Buki**

vice president of the INTS  
head of the organizing committee

**Tamas Doczi**

chair of the national advisory board
