

Lipid metabolism II.

Eicosanoids

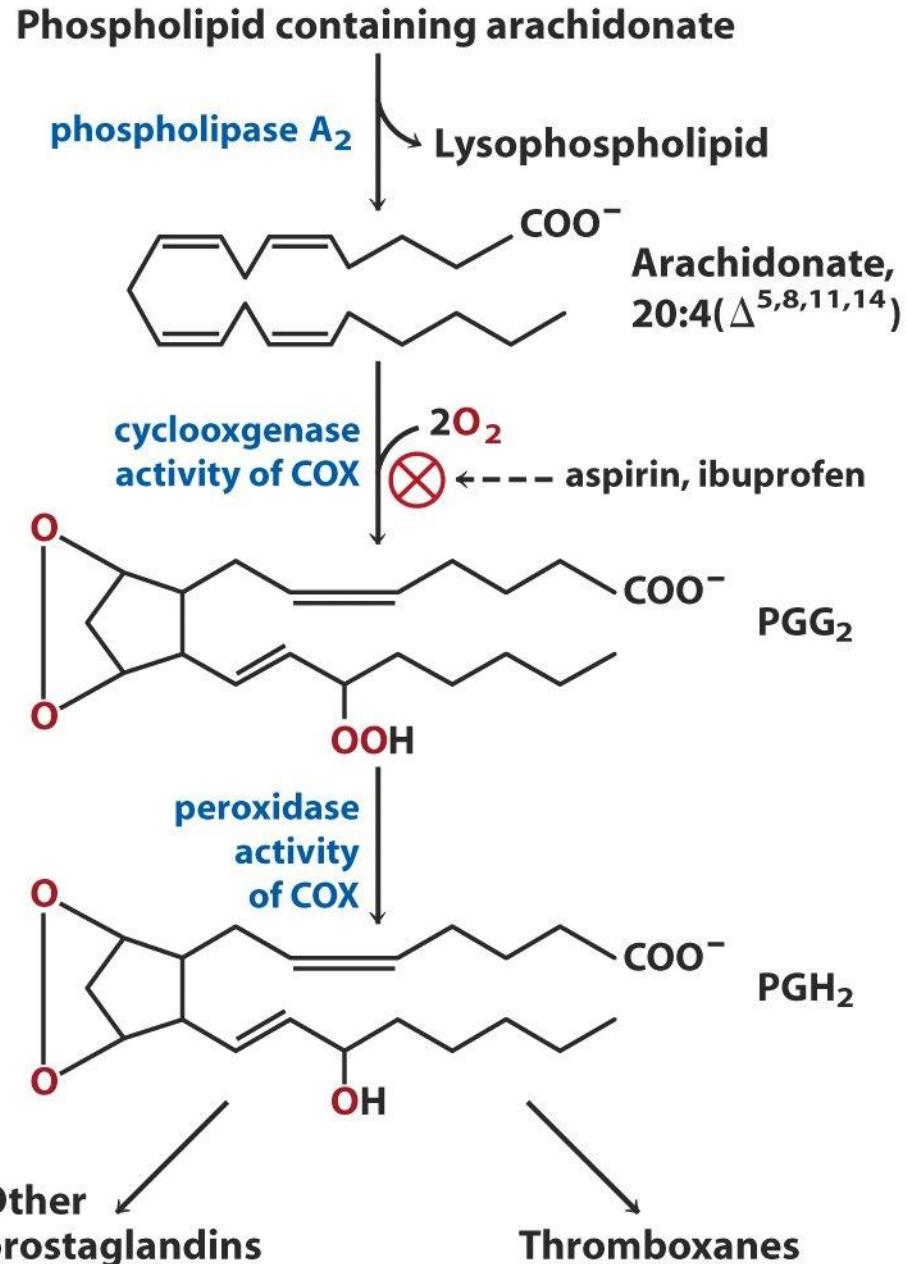

Cleavage sites of phospholipases

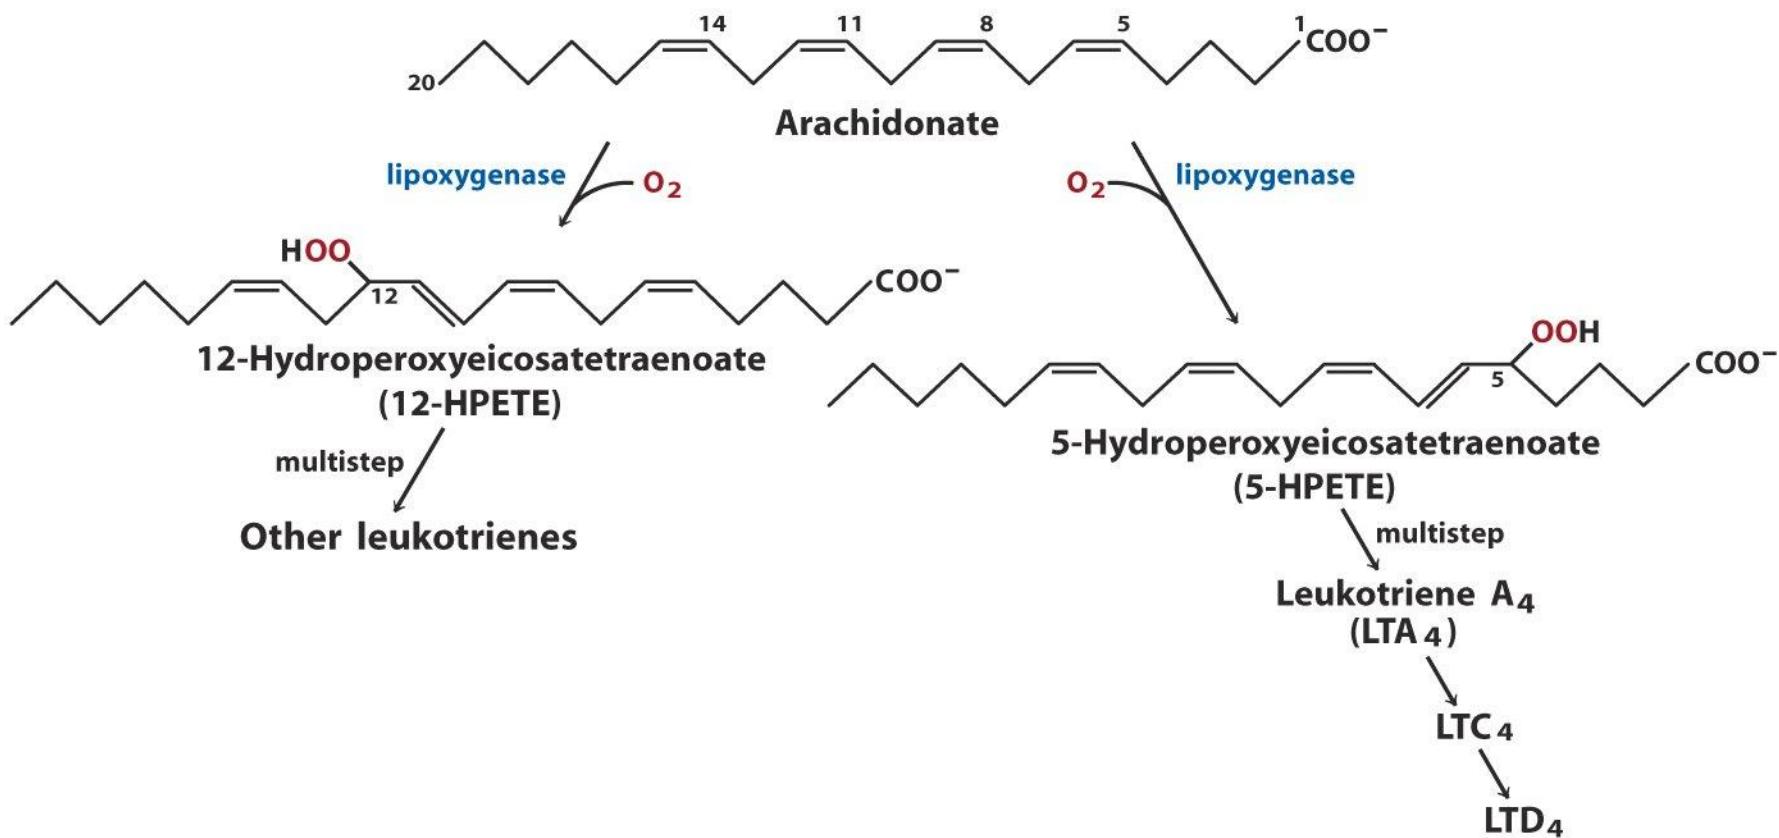

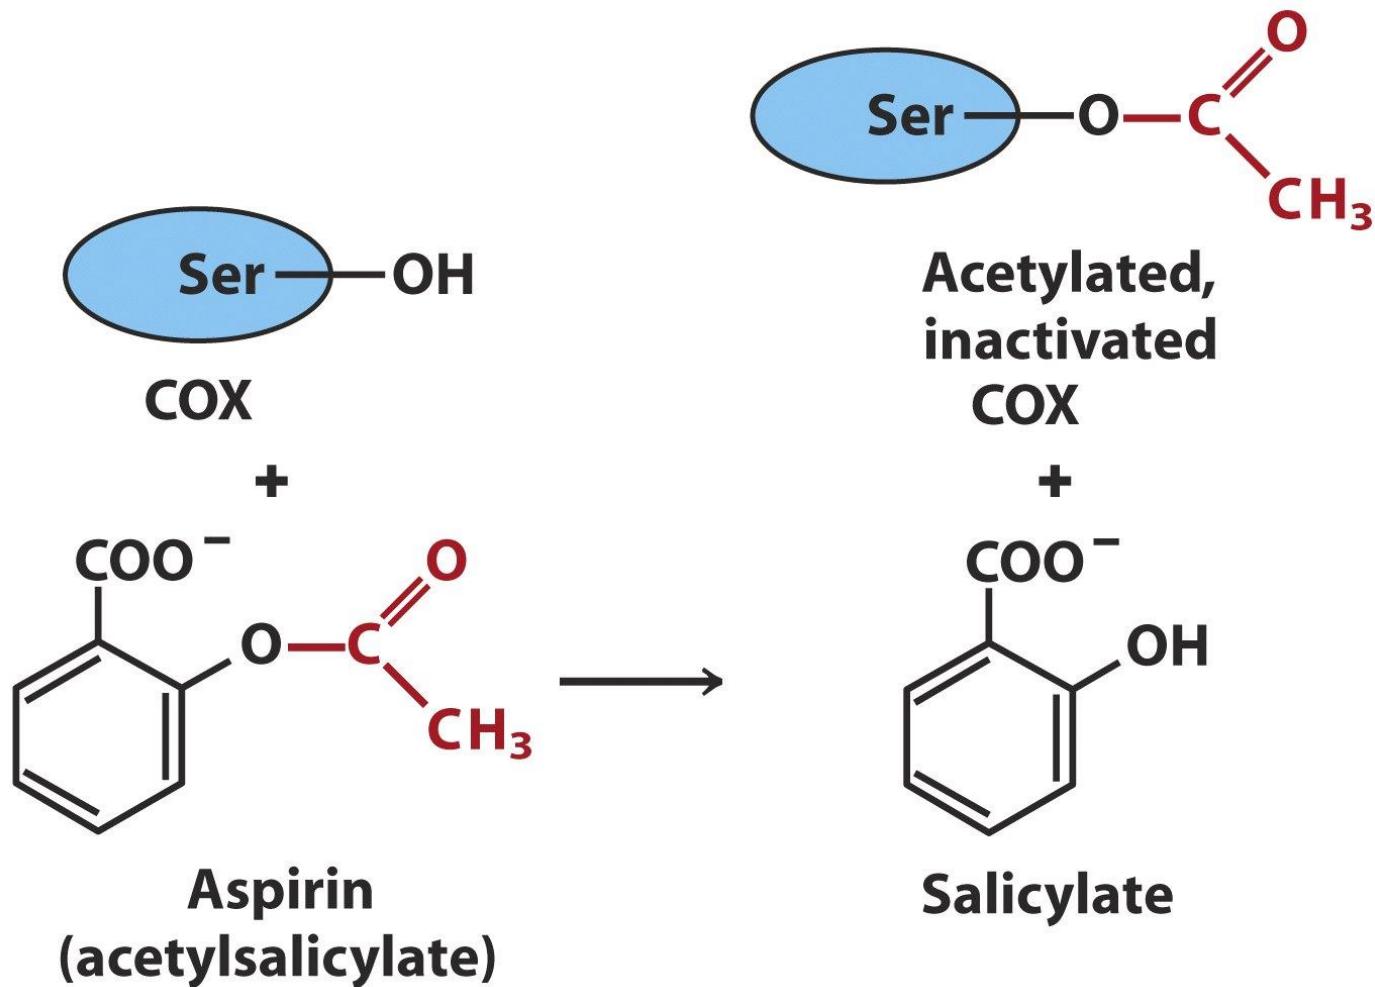

Cyclooxygenase pathway

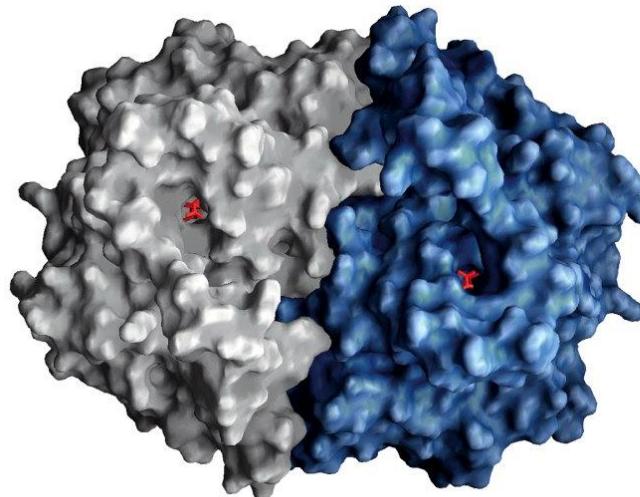

Lipoxygenase pathway

Specific inhibition of cyclooxygenase pathway

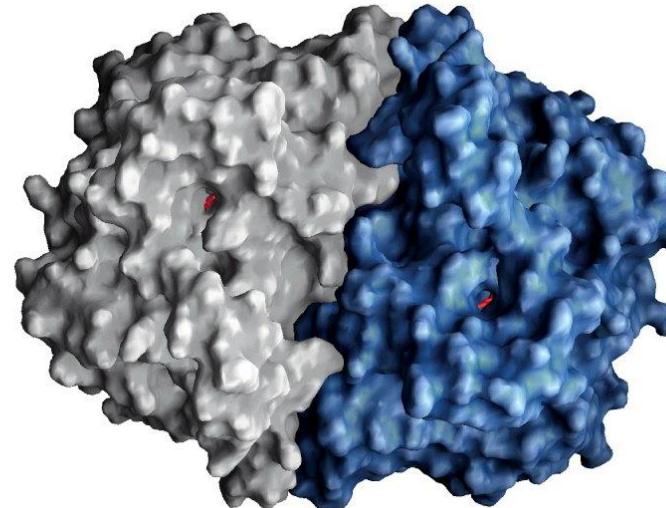

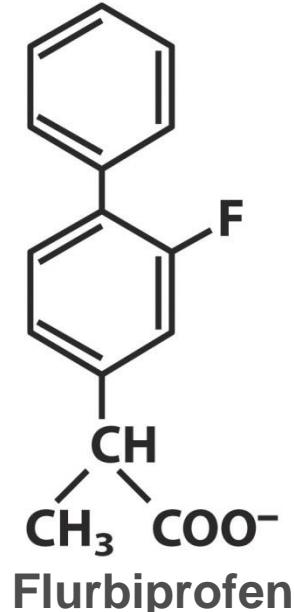

Isotype specific inhibition of cyclooxygenase pathway

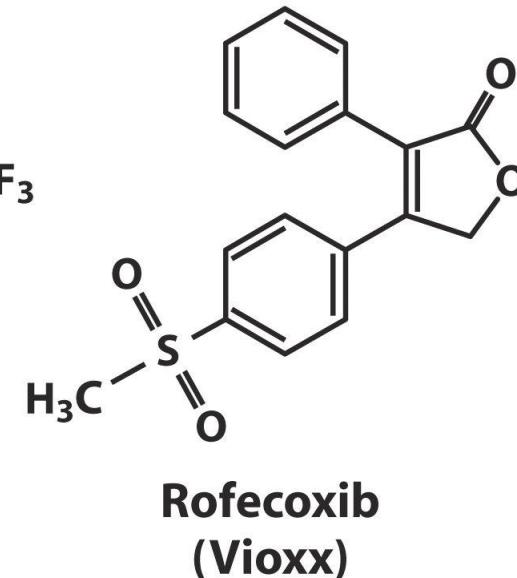

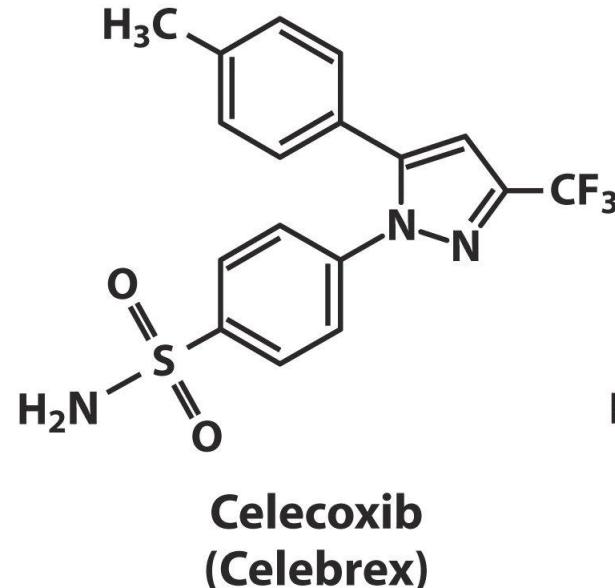

COX-1

synthesis of PGs that regulate the secretion of gastric mucin

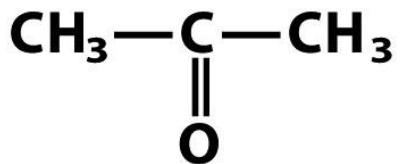

COX-2

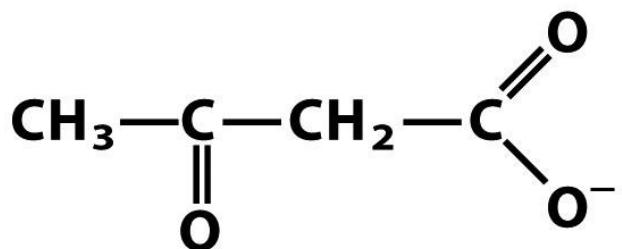

synthesis of PGs that mediate inflammation, pain, and fever

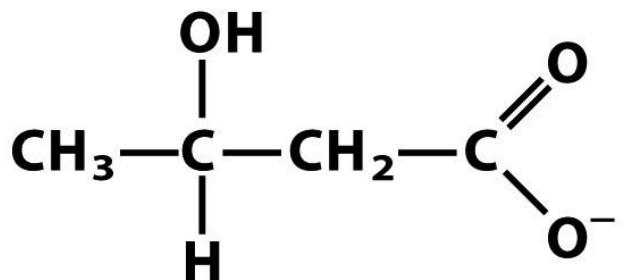

Ketone bodies

Acetone

Acetoacetate

D- β -Hydroxybutyrate

Unnumbered 17 p666

The use of ketone bodies as fuel

Ketone bodies are used as fuels in all tissues except liver, which lacks this enzyme.

Synthesis of activated isoprenes

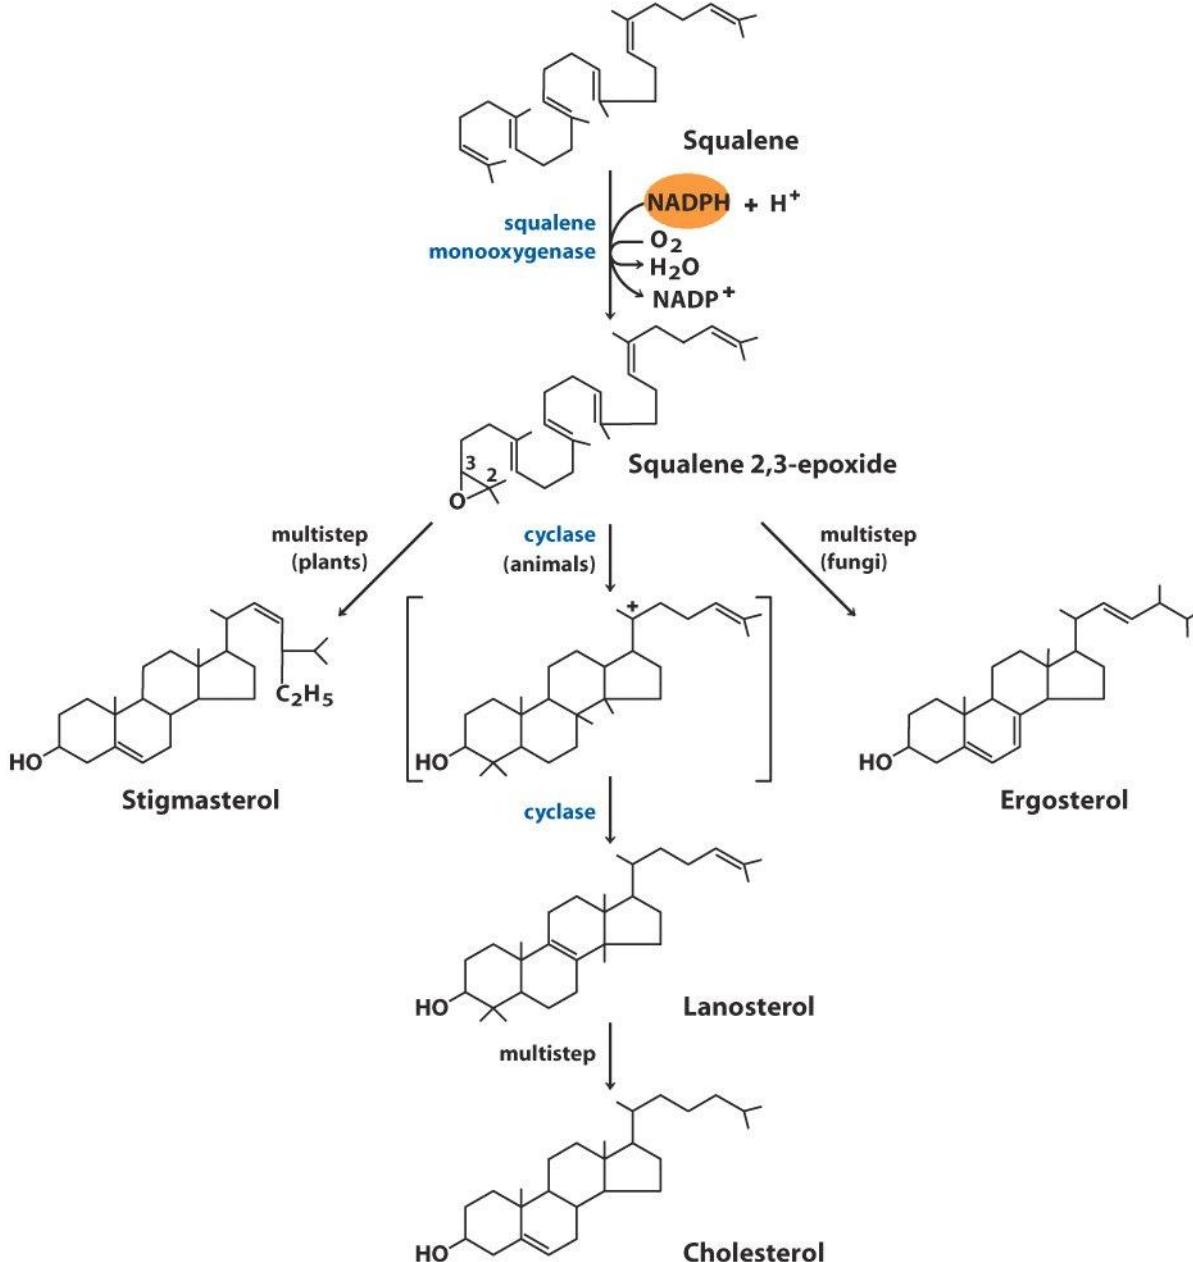

Synthesis of squalene I

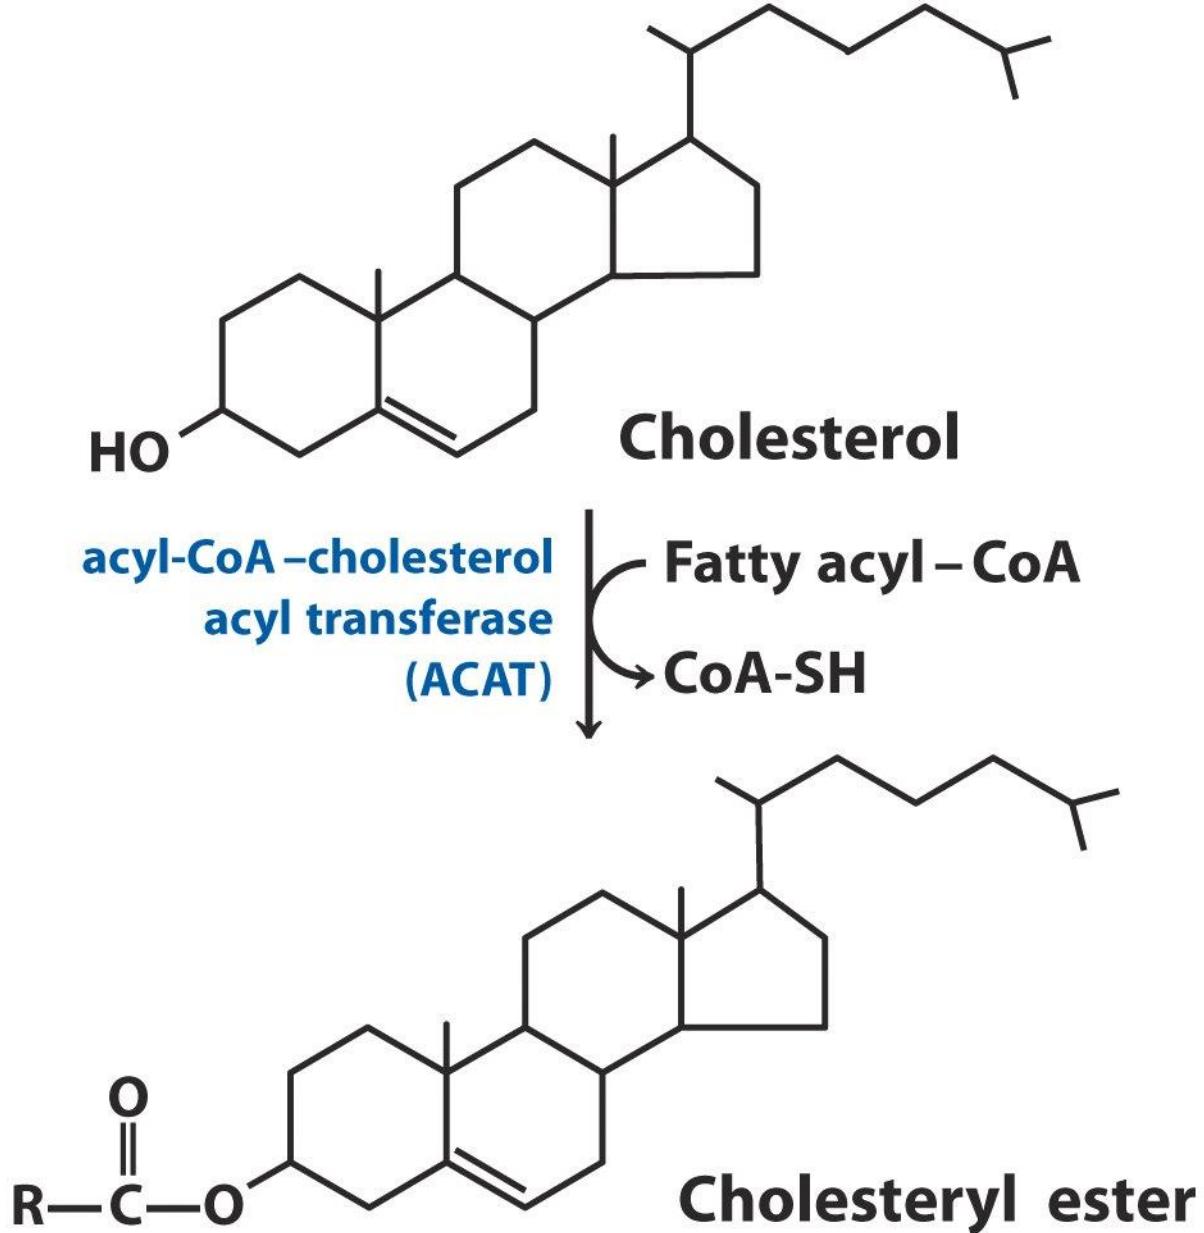

Synthesis of squalene II

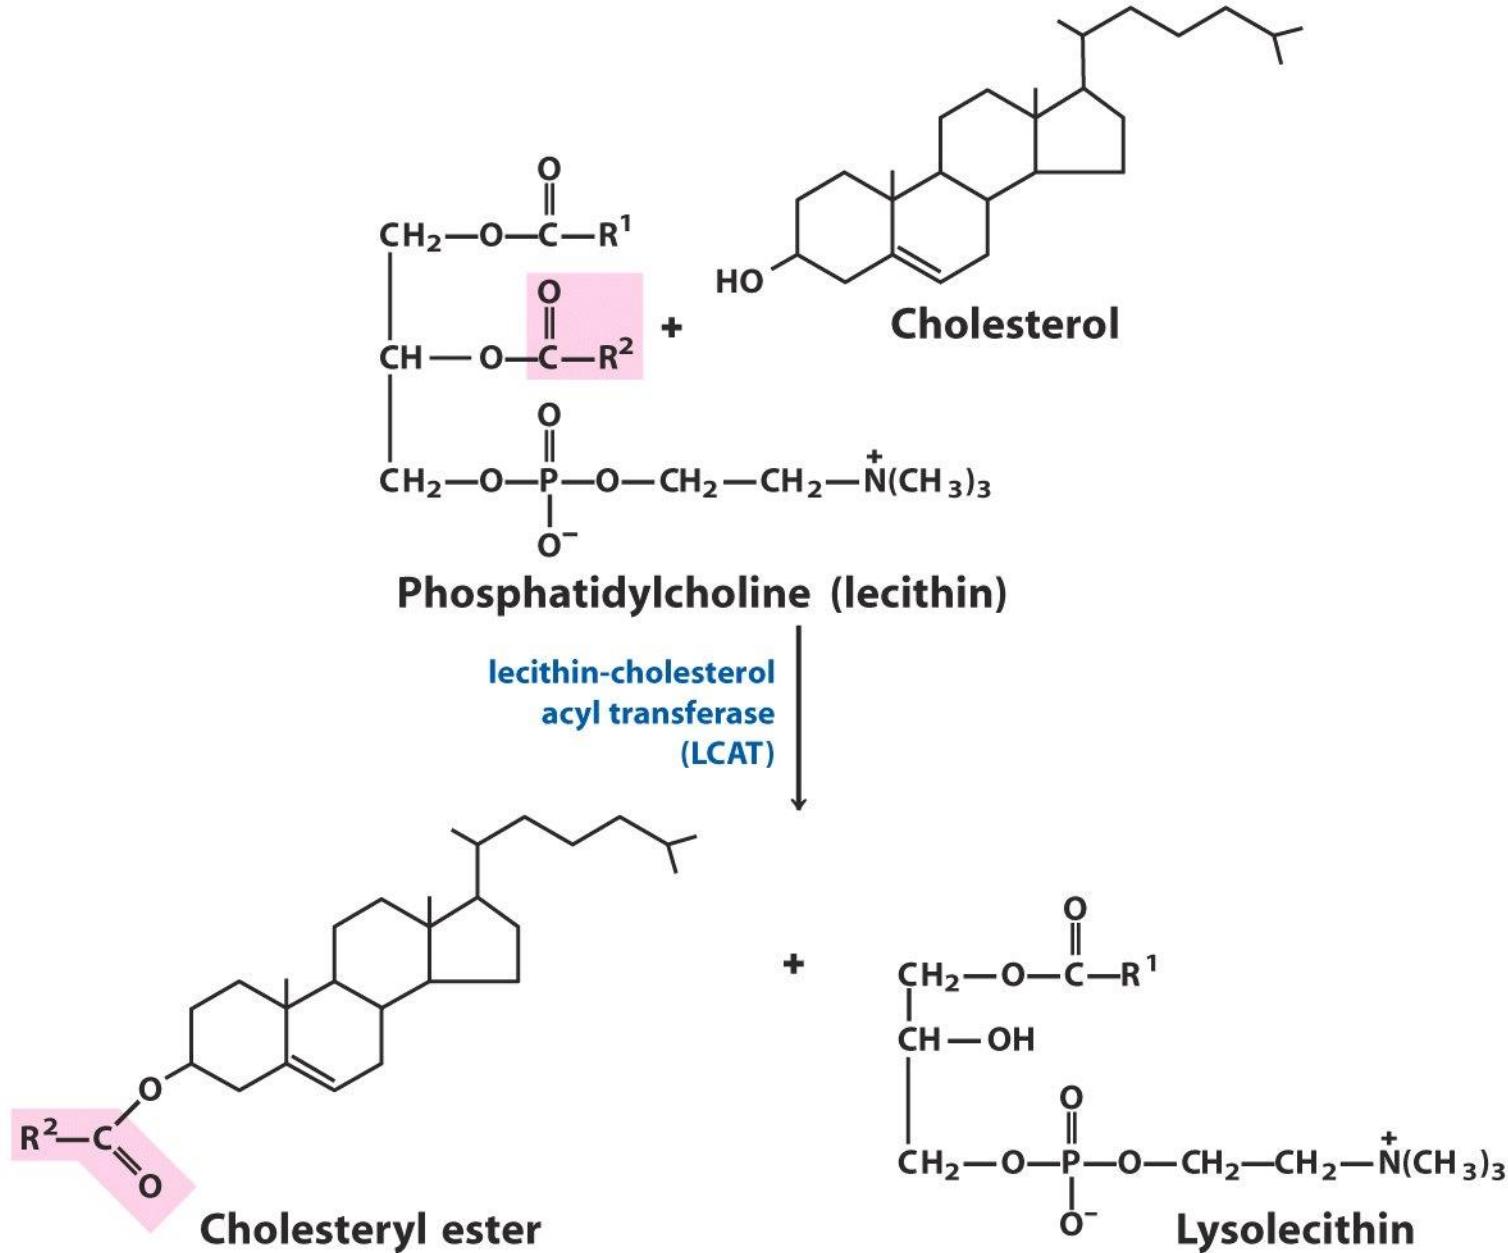

Production of cholesterol from squalene

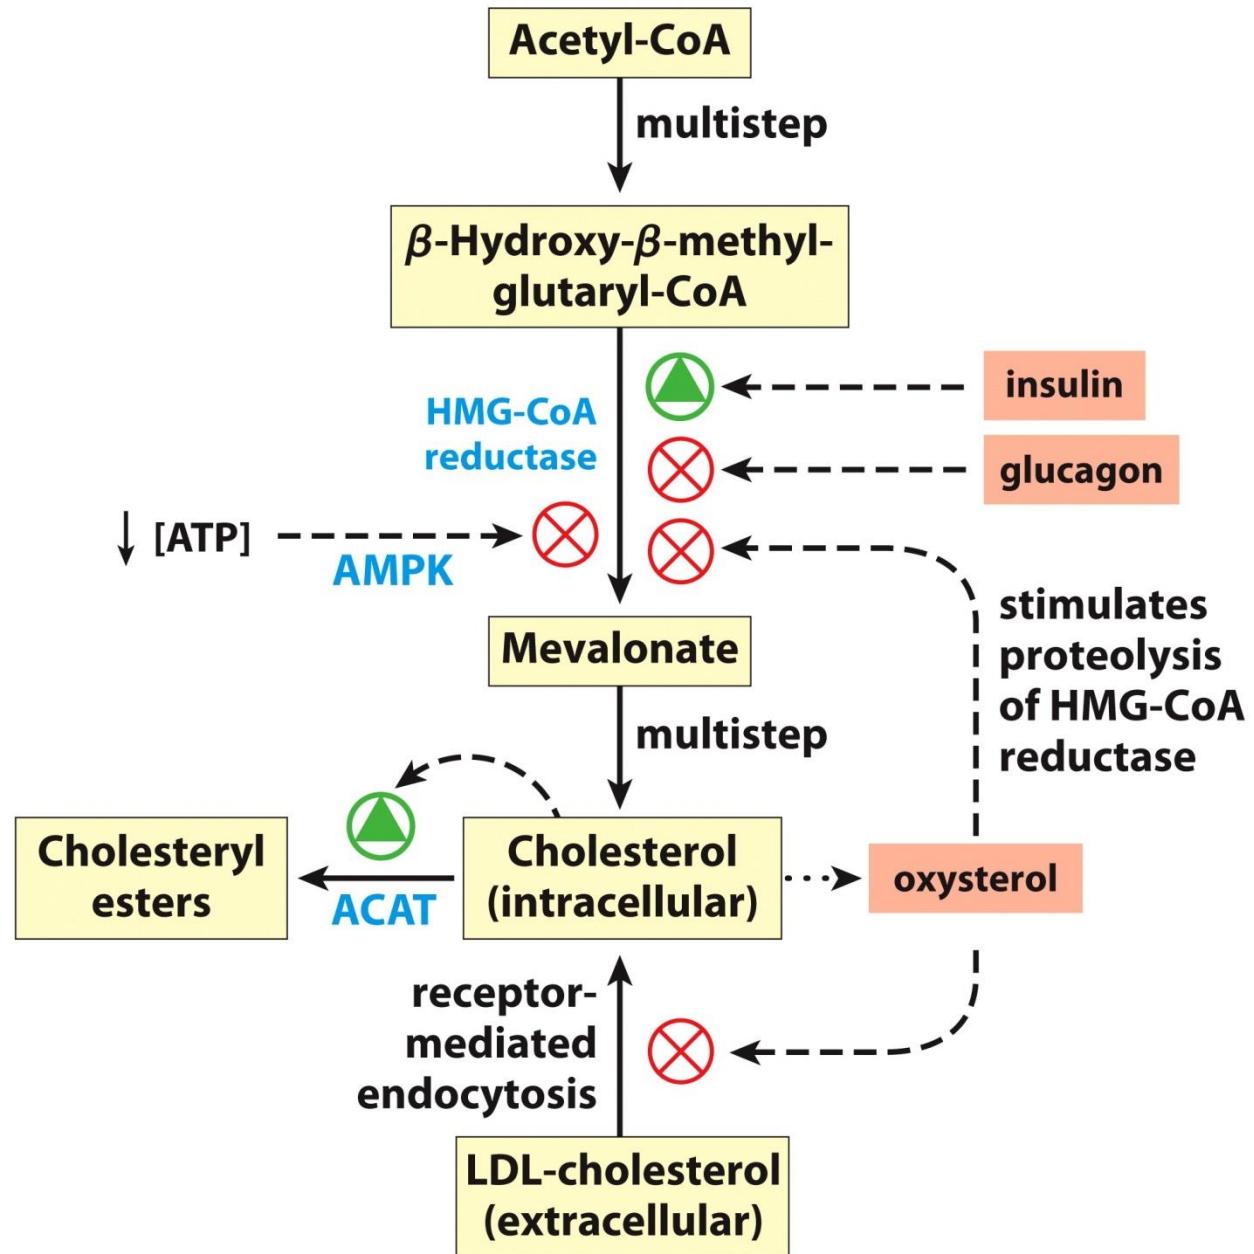

Esterification of cholesterol I.

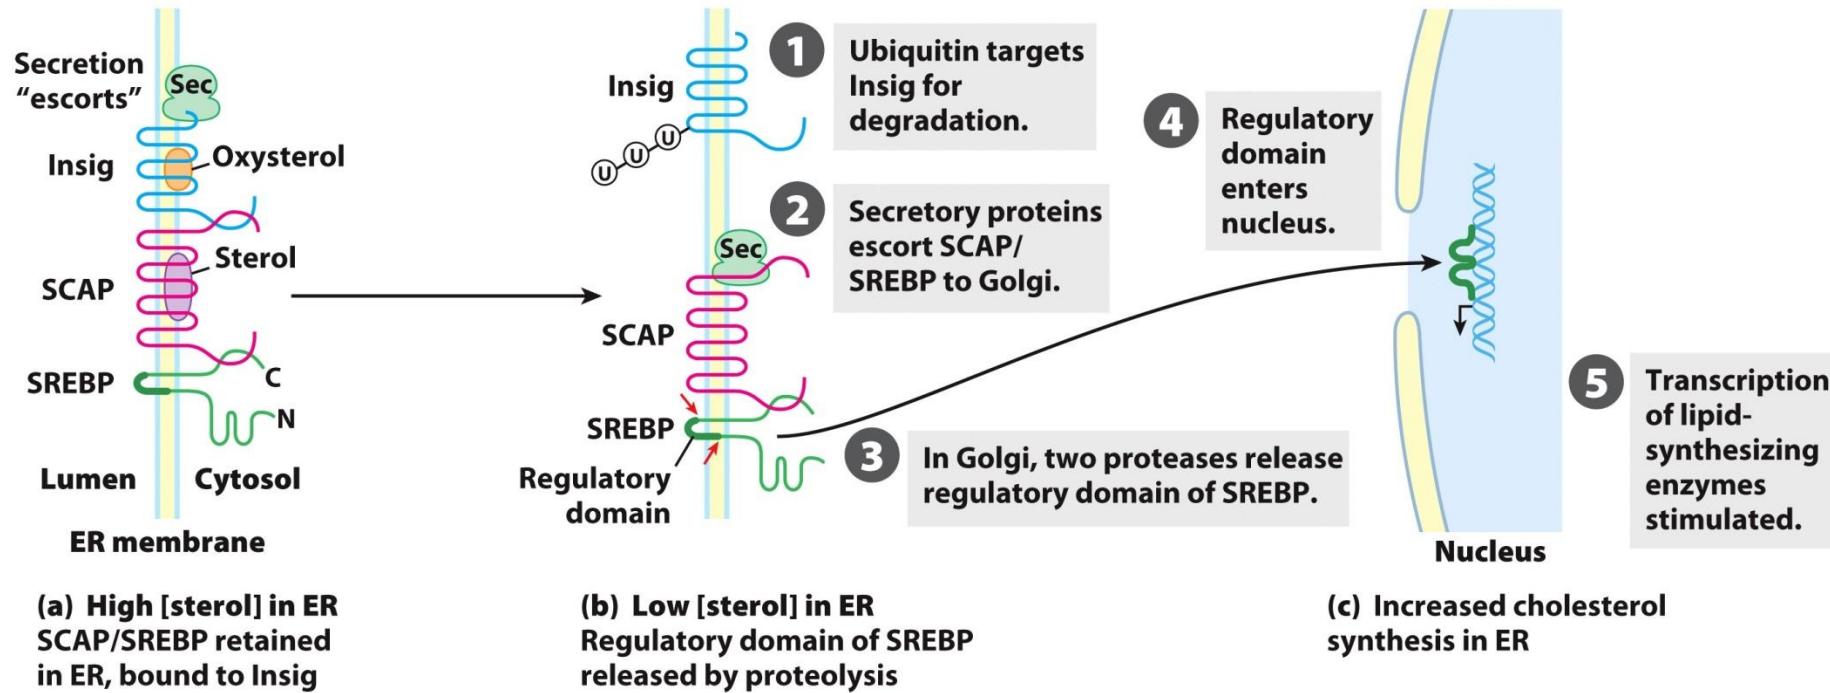

Esterification of cholesterol II.

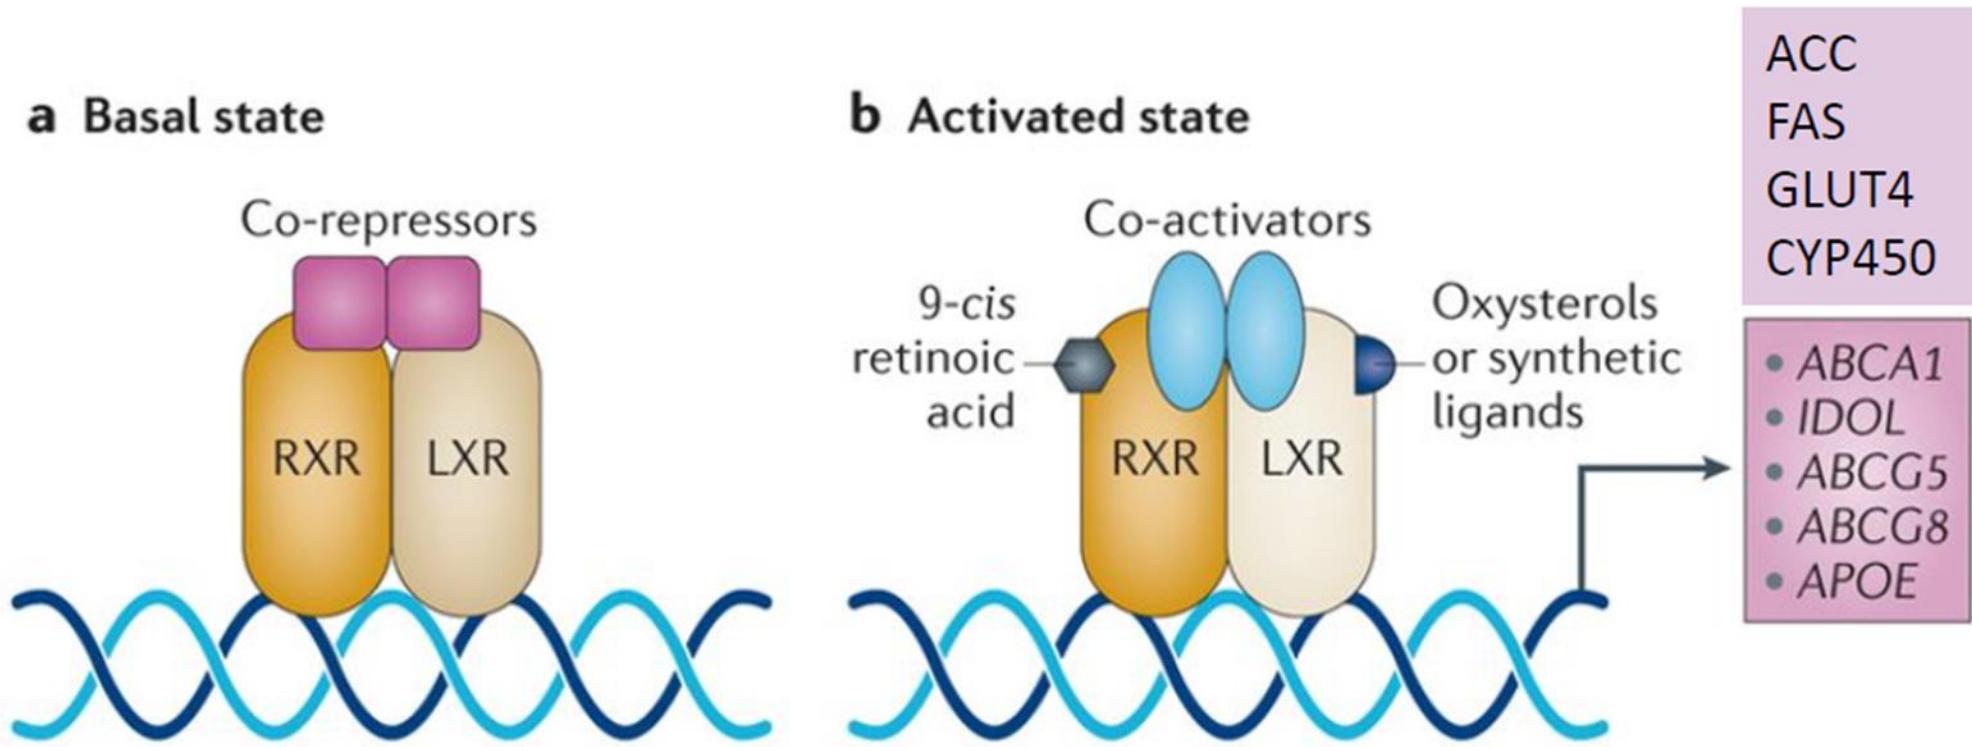

Regulation of cholesterol synthesis

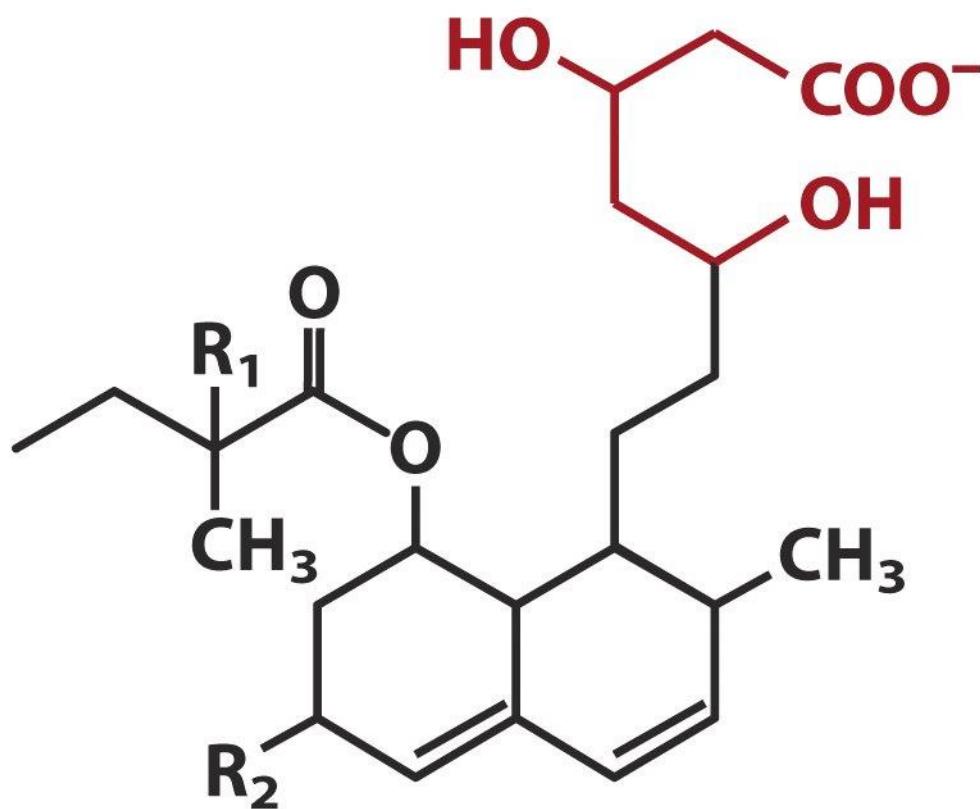

Transcriptional regulation

Transcriptional regulation

Statins

$R_1 = H$

$R_1 = CH_3$

$R_1 = H$

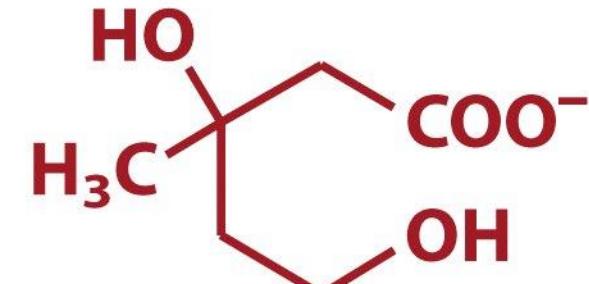

$R_1 = H$

$R_2 = H$

$R_2 = CH_3$

$R_2 = OH$

$R_2 = CH_3$

Mevalonate

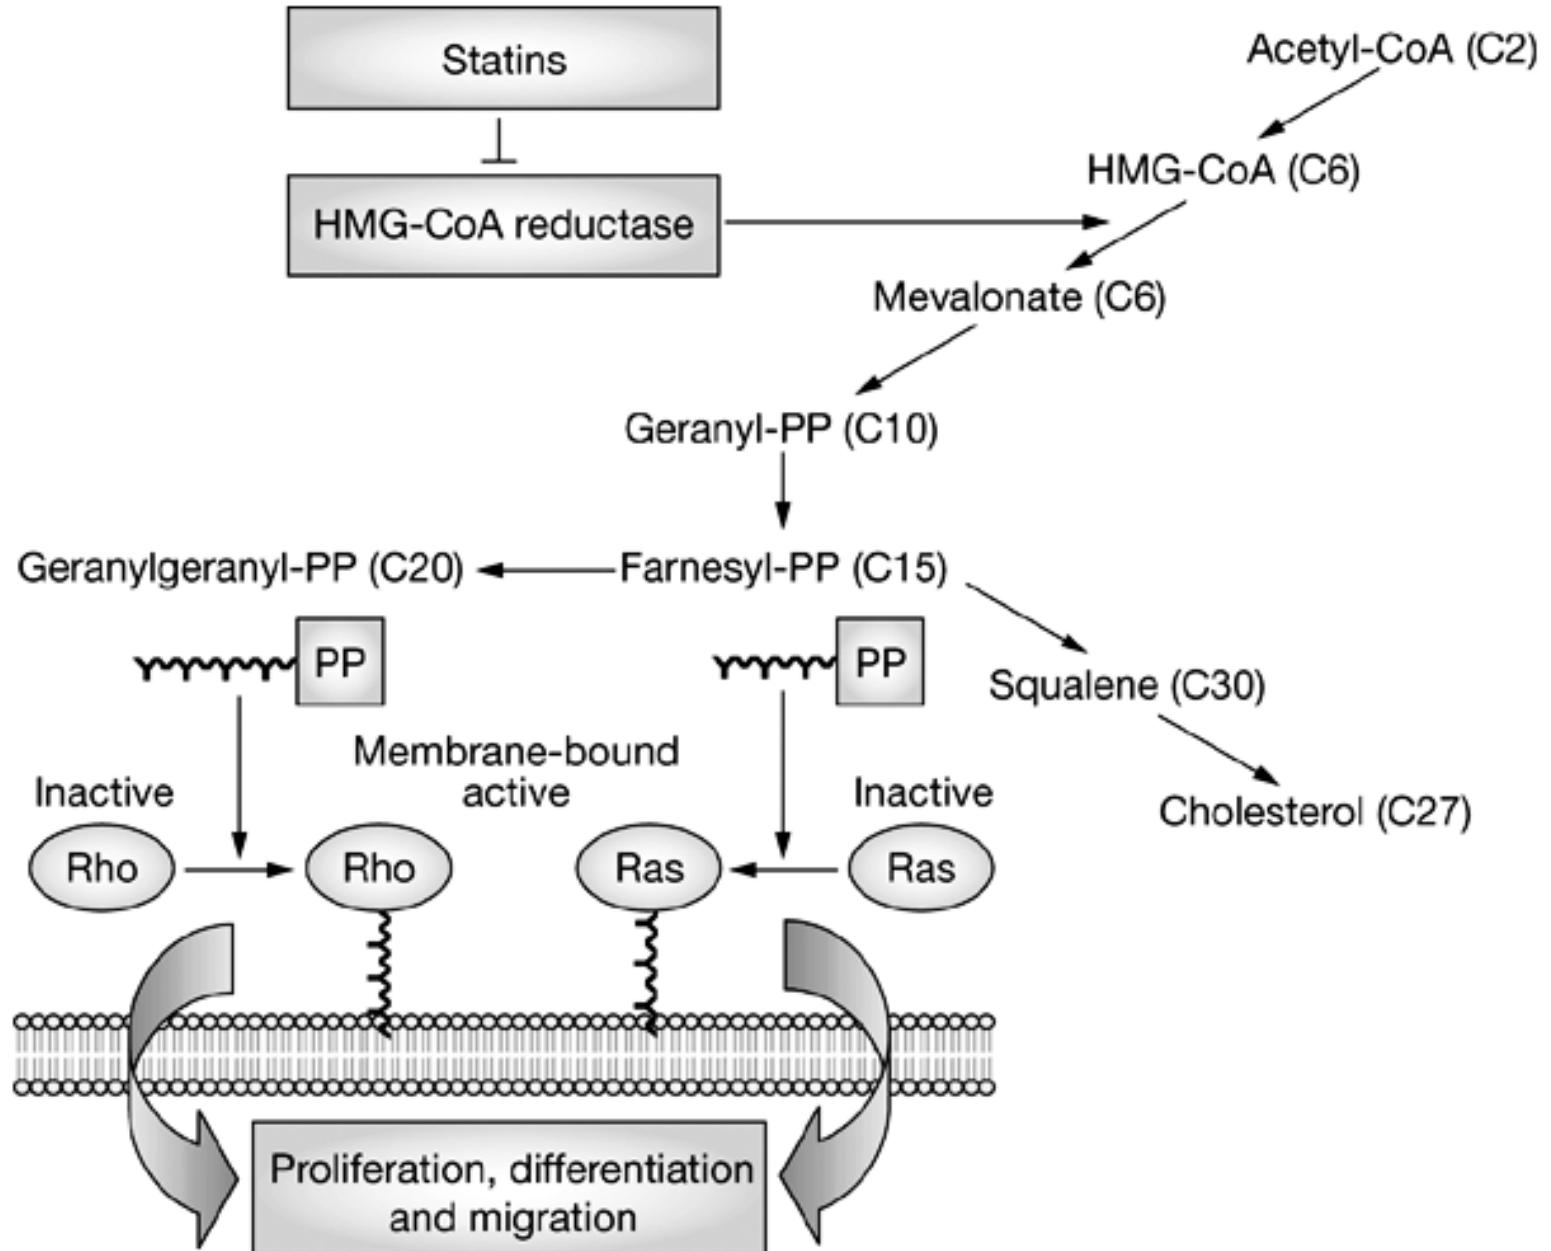

Compactin

Simvastatin (Zocor)

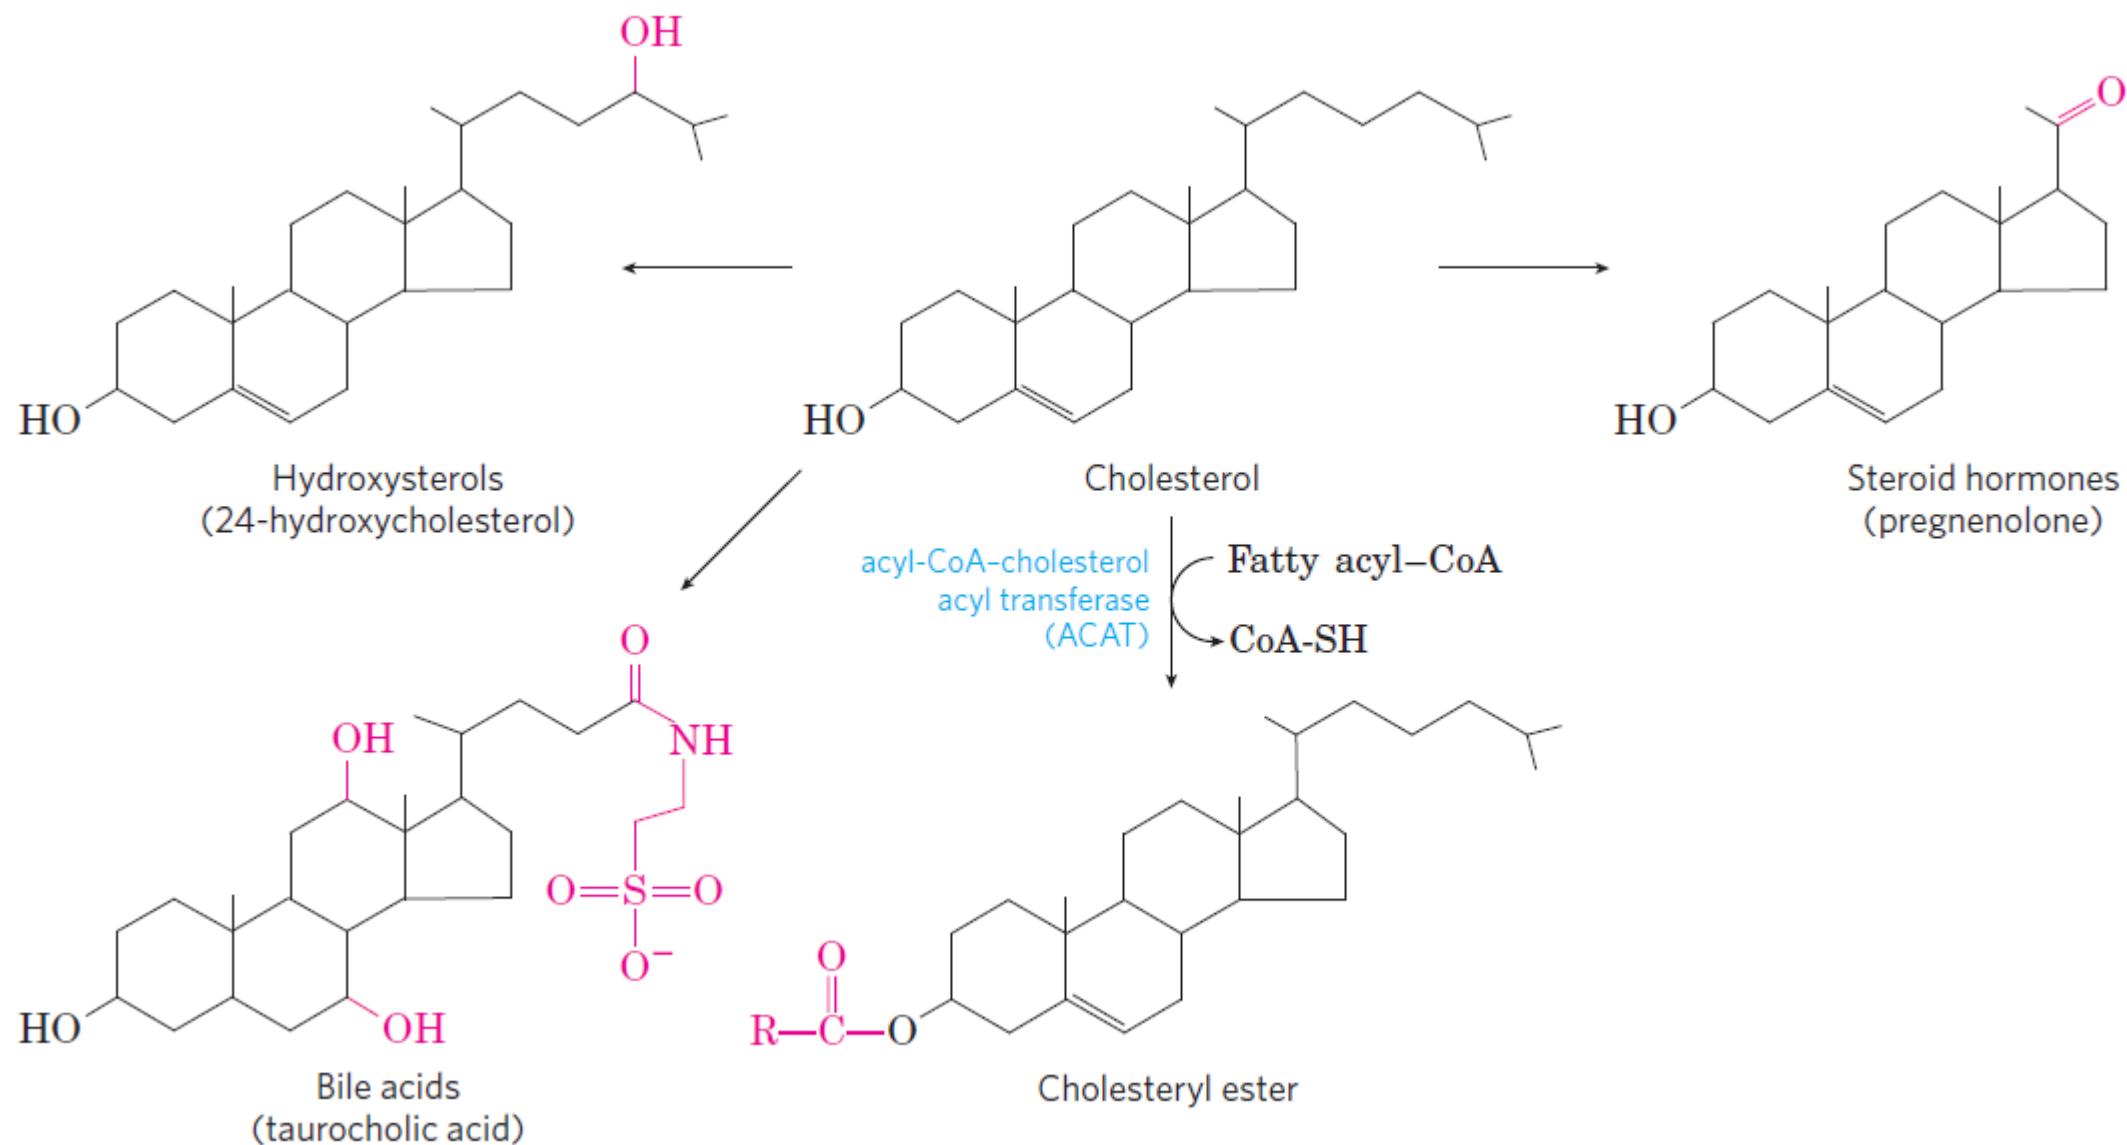

Pravastatin (Pravachol)

Lovastatin (Mevacor)

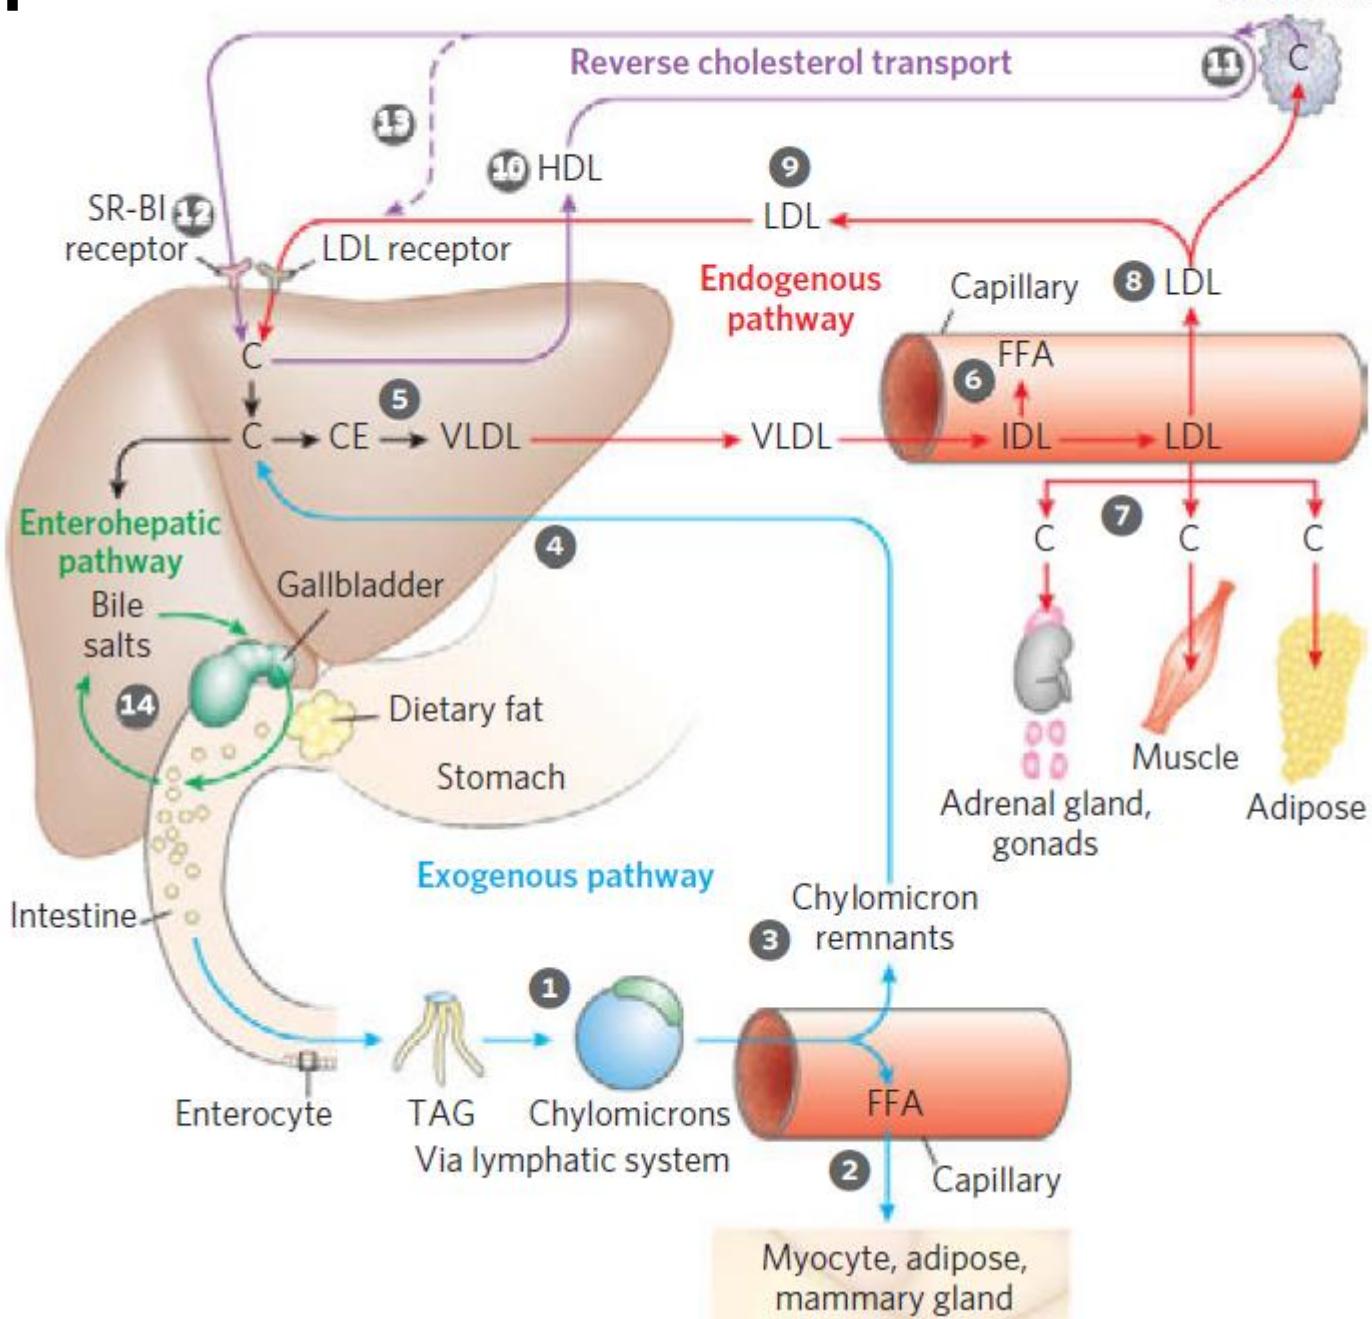

Statins

Possible metabolic fates of cholesterol

Cholesterol transport

Cholesterol transport - LDL
