

Quality objectives of the University of Pécs Medical School for 2026

Deadline for achieving all three quality objectives: 31 December 2026.

1. Educational development through reviewing the framework of the feedback culture and adapting it to meet partners' needs.

- Developing and introducing a unified feedback system concept integrating student and teacher feedback, the results of educational development visits, and the evaluation of study and service experiences.
- Developing a development-oriented feedback culture and system that supports educational processes, covers all stages of student lifecycle, and informs educational development decisions.

Faculty coordinator: Dr. László Czopf, Vice-Dean for Education

2. Expansion of research projects focusing on data science issues and artificial intelligence, development of educational topics and procedures regulating the use of artificial intelligence.

- Use of artificial intelligence in education: expansion of educational topics and regulation of student use in the Code of Studies and Examinations.
- Use of artificial intelligence in scientific activities, research projects, professional recommendations, and development of procedures.

Faculty coordinators: Dr. Dóra Reglődi, Vice-Dean for Science, and Dr. László Czopf, Vice-Dean for Education

3. Strengthening relationships with secondary schools, integrating young people applying for faculty programmes into university life.

- Developing and promoting preparatory courses that facilitate academic integration.
- Increasing the number of first-time applications and enhancing the competence level of incoming students.

Faculty coordinators: Dr. Tamás Tényi, Vice-Dean for General Affairs, Student Welfare and International Relations, and Dr. László Czopf, Vice-Dean for Education

Pécs, 18 December 2025

Dr. Miklós Nyitrai
Dean
