

# 15<sup>th</sup> International Student Congress of Medical Sciences

Abstract submission opened!

Deadline: 15<sup>th</sup> of February 2008

From Tuesday the 3<sup>rd</sup> till Friday the 6<sup>th</sup> of June 2008, the **15<sup>th</sup> International Student Congress of Medical Sciences** (ISCOMS) will take place at the University Medical Center Groningen (UMCG), the Netherlands.

In 2007, 647 students from 41 countries attended the congress, 205 of them presented their research either plenary, orally or with a poster. In addition we offer a broad range of workshops and lectures from key-note speakers. There is also an extensive social programme.

ISCOMS is constantly growing and we are proud to present *nobelprize winner prof. dr. Blobel* and the renowned prof. dr. Wedzicha of the University College of London as two of our key-note speakers this year! In this year's edition special attention will be dedicated to 100 years of pharmacology. We can also offer the opportunity to participate in a (minimal) two week ISCOMS research fellowship at one of the institutes of the UMCG.

To make the congress more accessible for students we can provide travel grants and offer student friendly entrance fees and cheap accommodation.

ISCOMS aims to get medical students acquainted with scientific research and enable them to present their own research. Medical students who have participated in research projects are offered the opportunity to present their results, by oral presentation or poster. ISCOMS thus promotes student research and helps students in their future research careers and research exchange. Furthermore, representatives of all research departments of the UMCG will be present to provide information about their current research projects.

The deadline for abstract submission is the 15<sup>th</sup> of February 2008 on [www.iscoms.com](http://www.iscoms.com)

If you have any other questions, please let us know at the following email address:
