

# International Life Sciences Students' Conference

10- 14 September 2008 · Warsaw · Poland

Natural sciences are one of the most rapidly growing fields of science. They are crucial for better understanding the world around us but also for introducing new technologies to improve the quality of our everyday life. To keep in touch with current achievements in those disciplines, we decided to organize 'International Life Sciences Students' Conference Warsaw 2008'.

The conference will take place from 10th to 14th September 2008 at the University of Warsaw and Warsaw University of Life Sciences. It will be the second edition of the event which took place for the first time in November 2007 in Ljubljana. Participants of Slovenian conference were natural sciences' students from 21 countries. Enormous success of the previous conference inspired students' societies to organize annual events in various countries in Europe.

The main aim of our conference is to gather students from all over the World. They will present results of their own research and extend scientific acquaintances.

Participants of our conference BSc, MSc and PhD students of life sciences will give their presentations in English. Presentations will be arranged in four sections concerning different aspects of natural sciences and judged by scientific authorities in each discipline. The best presentations will be awarded.

#### Sections:

- Molecular Biology
- General Biology
- Disease Prevention & Human And Animal Wellness
- Environmental Protection, Earth Sciences & Alternative Energy Sources

***The entrance fee: 30€***

*Accommodation, meals and entertaining activities including field trips will be provided for all participants*

***You are kindly invited to join us!***
