EMSA/JEMSA

EMSA is:

- An association representing students from individual medical faculties in geographical Europe
- Currently uniting over 65 medical faculties, in 23 different countries across Europe
- Politically neutral, non-governmental and independent, non-profit organisation
- Founded in 1991 in Brussels, Belgium

The European Medical Students' Association (EMSA) seeks to improve the health and quality of care of the citizens of Europe, by acting as a conduit for increased interaction and sharing of knowledge between European medical students in the areas of medical education, ethics, science and European integration. The Journal of EMSA on Medical and Scientific Affairs, JEMSA, is a European journal in English language open to students and young doctors from all fields of medicine and related research. JEMSA holds a unique place in publishing European medical students' scientific articles and other papers, since the journal is edited and produced by medical students for medical students. We have an author helpful policy and offer assistance to less experienced authors, assisting authors in the preparation of their manuscripts for the peer review process. For more information please contact JEMSA Editor-in-Chief: jemsa@emsa-europe.org
A presentation of EMSA and the Journal of EMSA is scheduled during the course
